

# ULTRASONIC HUMIDIFIER

## QUICK START GUIDE

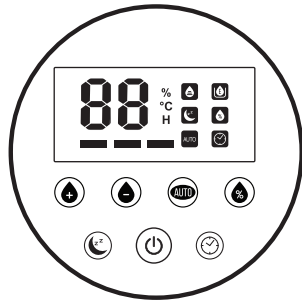

### WHAT'S INCLUDED

- Humidifier

### PARTS LIST

1. Mist Nozzle
2. Handle
3. Tank Cover
4. Power Cord
5. Control Panel
6. Aroma Container

### LED DISPLAY

### BUTTONS

ON/OFF

Mist Level

 Night Mode (Mist level based on room humidity)

 Auto Mode (humidity maintained at 55-68%)

 Humidistat (adjust manually from 40-80%)

 Timer Mode (set the time between 1 - 10 hours)

 Humidifier Running Indicator

 Out of Water

% = Humidity  
°C = Temperature  
H = Timer

### HOW TO USE

BEFORE USING, please make sure that all parts are clean and assembled correctly on the unit.

- Pull the water tank out of the unit, unscrew the cap and fill with water. It is recommended that you use water less than 40 degrees Celsius (100 degrees Fahrenheit).

- Replace the cap tightly and place the tank in the unit.
- Plug in the unit and press the ON/OFF switch to turn it on.

### HOW TO USE THE AROMA FUNCTION

- Remove the aroma container from the unit and add a drop of water-soluble aroma oil to the sponge in the container.
- Replace the aroma container back in the unit.
- If you do not want to use the aroma function, remove the sponge and wash it completely before returning it to the unit.

### HOW TO USE THE TIME FUNCTION

- Press the TIME button on the LED display panel to choose the number of hours that you would like the unit to run.
- You can choose between 1 and 10 hours.
- The unit will turn off after the timer has run out.

### HOW TO USE THE AUTO MODE FUNCTION

- Press the AUTO button on the LED display panel.
- The machine will maintain a relative humidity level of 55-68%.
- The machine will adjust the mist level based on the room humidity.
- Touch the AUTO MODE button again to stop the machine.

### HOW TO USE THE NIGHT FUNCTION

- Press the NIGHT MODE button on the LED display panel.

- The machine will dim and only the NIGHT MODE button will be visible.
- The machine will adjust the mist level based on the room humidity.
- Touch the NIGHT MODE button again to stop the machine.

### HOW TO MANUALLY SET THE HUMIDITY LEVEL

- Press the HUMIDISTAT button on the LED display panel to choose the desired humidity.
- You can choose between 40 and 80% RH by pressing the HUMIDISTAT button until the level is displayed.
- The machine will stop working once the humidity level is reached.
- Please note the mist level button has 3 settings that control the output of mist which will help you reach your humidity level quicker if you so choose.

## CARE INSTRUCTIONS

NOTE: Before cleaning, make sure the unit is unplugged.

- Rinse the water tank with warm water twice a week when using the unit frequently.
- Wipe away scale and sediment with a soft dry cloth or a soft brush.
- Rinse with warm water.
- For a deeper clean, you may run the machine with vinegar or a gentle detergent mixed with water.
- Do not use harsh detergents.
- Dry the tank completely.
- Wipe down the unit with a soft dry cloth as needed.

## TROUBLESHOOTING

| PROBLEM   | POSSIBLE REASON  | SOLUTION   |
|---|--|--|
| There is no steam.                                | There is no power.                                       | Make sure the unit is plugged into a working 110V outlet<br>Make sure the ON/OFF switch is activated |
|   | There is no water or not enough water in the water tank. | Add more water to the water tank.  |

|                    |   |  |
|--------------------|---|--|
| The unit is noisy. | The water in the tank is old.                   | Empty the water in the tank and clean it thoroughly.<br>Refill with fresh water. |
|                    | The water tank is inserted incorrectly.         | Remove the water tank and reinsert it into the unit correctly.                   |
|                    | No water or not enough water in the water tank. | Add more water to the water tank.  |
|                    | The unit is not level.                          | Place unit on a firm and level horizontal surface.                               |

## WARNINGS

- This humidifier should only be used for its intended use.
- It is recommended that this unit only be used when the air temperature is between 5 to 40 degrees Celsius (40 to 100 degrees Fahrenheit) and the humidity is less than 80% RH.
- Make sure the unit is plugged into a grounded and safe 110/120V outlet.
- Use this unit on a flat and firm horizontal surface.
- Do not use the unit in a wet environment such as a bathroom.
- Do not immerse the unit in water.
- Do not touch the plug or cord with wet hands.
- Do not reach into the unit while it is running.
- Do not clean the unit while it is running.
- Remove the water tank from the unit before moving it.
- Do not run the unit near a heater or heat source.
- Do not run the unit near furniture or electronics as the steam may damage them.
- Keep this unit out of the reach of children.
- Do not attempt to disassemble or repair the unit.

## SPECIFICATIONS

- Power Range: 25 volts
- Water Tank Capacity: 4.5L
- Rated voltage: 100-240 volts
- Maximum moisture capacity: >350ML/H
- Rated frequency: 50/60Hz
- Use time for a full water tank: 15 hours
